

Dear Landscape and Lawn Service contractors,

Spring 2008

AGGRAND has put together a program that lawn service contractors like to add a profitable upsell to your existing business. No equipment required... other than a garden hose. AND, it's CERTIFIED organic! MSDS sheets and product literature linked below. Labels also linked from the photographs. See [Organic VS Chemical Lawn Care](#) article. Full detail of our products at [www.reykur.us](http://www.reykur.us) .

AGGRAND liquid organic products are easy to apply, direct to any lawn or garden using a hose end sprayer right from the bottle. No mixing, no chemicals, no safety concerns, no bags to dispose of. You tell the homeowner that totally ORGANIC is helping reduce chemical run-off which pollutes their streams and lakes. (Homeowner associations and municipalities LOVE to hear that! No more green ponds and lakes!) We have great testimonials from [golf courses and contractors](#) for both lawns and ornamentals. A soil test is recommended, but not critical.

Give me a call to sort out questions. Lancaster warehouse direct [Wholesale Prices](#) << click for current pricing. Order at wholesale rates online. Products are available in quarts to 55 gallon barrels. As a registered Retail Account, you can purchase all AGGRAND and AMSOIL products at wholesale for your use or for resale. You will have a password account.

You can visit my AGGRAND site at [THIS LINK](#), or look up AGGRAND on the Penn State [www.AgMap.org](http://www.AgMap.org) site. Or contact me at 570-401-4843. I can meet with you at your location if necessary.

A soil test is recommended, but not critical. Here's my estimate for application to a typical lawn for an entire year:

Aggrand application rates and estimates for lawn sizes		(these are estimates and do not reflect soil tests or actual Sq Footage)						wholesale
Property	Sq Ft	estimated House	net Sq Ft	Fertilizer quarts 4-4-3 4 applications	Bonemeal quarts 0-12-0 2 application	Kelp/Potash quarts 0-0-8 1 application	Total Quarts	Per Qt.
Size (acre)		Driveway shrubs		Per Application				annual cost
1/4 Acre	10890	-2820	13710	3.4	1.4	1.8	7	\$ 90
1/2 acre	21780	-3200	24980	6.2	2.5	3.3	12	\$ 165
1 ACRE	43560	-4000	47560	11.9	4.8	6.3	23 "x \$4.9*	\$ 315

Based on Retail Price List 2/2006

Purchasing 2.5+ gallon containers.

This assumes you apply all three products at estimated rates.  
Soil tests and observation of growth composition can improve these estimates.  
All applications are with hose end sprayer of undiluted products.  
Add your mark-up, add labor/acre (1 – 2 hr / acre est.)

## Here are complete links to our products:

(Available in quart, 2.5 gal & 55 gal containers.)
