

Perfect starter greenhouse!

Early Bloomer Greenhouse

Our Early Bloomer greenhouse is a great all-around greenhouse. It is ideal for tall plants or small trees - the 6'3" height gives you plenty of room to grow. The heavy-duty base makes it sturdy enough to withstand strong winds, and a large 19" x 30" vent assembly is included to maintain plenty of air circulation for healthy plants.

The lightweight greenhouse is portable, so you can set it right over your garden to get an early start planting seeds and an extended harvest in the fall. Two easy-access hanging rods at a convenient height run the entire length of the greenhouse to over winter your favorite hanging plants.

Early Bloomer Greenhouses are covered with advanced double-walled Solexx paneling. The Early Bloomer, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it.

Recommended Accessories

Deluxe Tie Down Kit - secures your greenhouse in strong wind.

Universal Solar Opener - opens your vent automatically while you are away (manual vent pictured)

Base Vents - place at the base of the greenhouse for optimal ground-up cross ventilation.

Shade Cloth - help keep your greenhouse cool and prolong the life of the panels in the summer.

Early Bloomer Greenhouses include:

- Easy-assemble fittings
- Twin-wall 3.5mm Solexx panels
- Large vent assembly
- Two full-length hanging rods
