

# Perfect against a wall!

## Harvester Greenhouse

The Harvester Greenhouse is completely enclosed for maximum strength, insulation, and solar heat collection. The Harvester provides the best of both worlds: a double-tiered bench frame maximizes your growing area on one side and a single bench frame on the other provides easy-access workspace and is ideal for taller plants.

All Harvester Greenhouses come with a large louvered air vent and are covered with advanced double-walled Solexx paneling. The Harvester, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it.

### Recommended Accessories

#### Harvester Greenhouses include:

- Easy-assemble fittings
  - Twin-wall 3.5mm Solexx panels
  - Easy-Flow Louver
  - Two-tier, built-in bench frames
  - Two full-length hanging rods
- (see back of brochure for more information)

G-408 8'W x 8'L x 8'H  
G-412 8'W x 12'L x 8'H  
G-416 8'W x 16'L x 8'H  
G-424 8'W x 24'L x 8'H  
G-408x (extension) 8'W x 8'L x 8'H

**Deluxe Tie Down Kit** - secures your greenhouse in strong wind.

**Solar Louver Opener** - conveniently opens your Louver while you are away (no electricity required!)

**Base Vents** - place at the base of the greenhouse for optimal ground-up cross ventilation.

**Shade Cloth** - during hot months, help keep your greenhouse cool and prolong the life of the panels.

**Wire Bench Shelves** - fit perfectly on the built-in bench frames to get full use of your growing space.
